

THE HUB MANUFACTURING COMMUNITY

VIVIANA BORCHERT
ANTONIO HERRERO FERNANDEZ
TINGTING HUANG CHEN
KIM JANINA WILTSCHKO

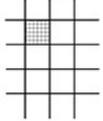

Wie lässt sich durch Architektur Gemeinschaft herstellen? The Hub ist ein sich stetig veränderndes Gebäude. Es bietet eine robuste Haupttragwerksstruktur in Form eines räumlichen Rasters mit technischer Infrastruktur. In dieses Raster können Boxen und Platten für Freiräume unterschiedlicher Größe und Nutzung eingeschoben werden. Alles ist möglich im Hub, aber nur, wenn die Bürger*innen von Durlach diese Herausforderung aktiv annehmen. The Hub wächst mit der Durlacher Gemeinschaft, wird permanent neu verhandelt und angeeignet. Er ist räumliches Spiegelbild und zugleich Spielfeld einer zukünftigen lokalen Gesellschaft.

How can community be created by architectural means? The Hub is a building in a constant state of change. It offers a robust spatial grid with the necessary technical infrastructure, so that boxes and floor slabs of diverse size and use can easily be plugged in. Everything is possible in The Hub which grows with the Durlach community, challenging the citizens' will to negotiate and appropriate its spaces. The Hub is mirror as well as playing field of the emergent local society.

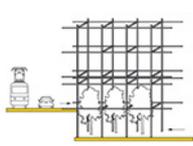

1. big grid

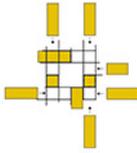

2. small grid

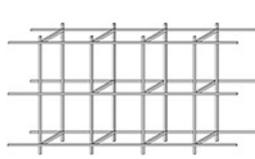

3. two ground floors

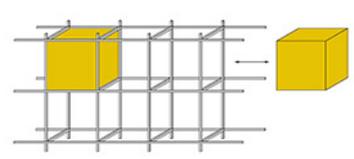

4. flexible plug in system

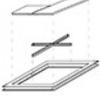

5. load bearing structure

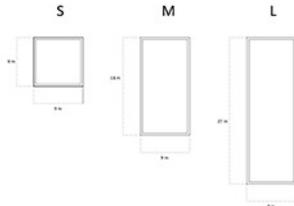

6. self bearing structure

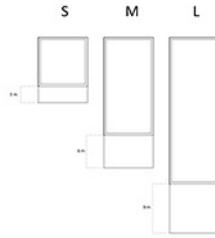

7. self bearing structure plates
